

JOTHICK RISHI

Coimbatore, 641031 | +91 75300 09321 | jothickrishi2717@gmail.com

Summary

DevOps Engineer with 4+ years of hands-on experience in designing, implementing, and managing CI/CD pipelines across Microsoft Azure and AWS environments. Proven expertise in automating infrastructure using Terraform and Ansible, resolving production issues, and integrating backend systems. Solid understanding of cloud computing, DevOps methodologies, and scripting for automation and visualization. Strong background in reducing deployment errors, improving customer experience, and maintaining high system availability.

Experience

DevOps Engineer Movate Technologies	02/2022 to Current Chennai, India
- Designed and implemented scalable cloud architectures on AWS (EC2, S3, RDS, Lambda, VPC) and hybrid cloud environments. - Developed Infrastructure as Code (IaC) solutions using Terraform for automated provisioning on AWS and Azure. - Built and streamlined CI/CD pipelines with GitHub Actions, Azure DevOps, and Jenkins to improve deployment efficiency and reduce manual effort. - Managed containerized workloads using Docker and Kubernetes, ensuring reliable and scalable deployments. - Migrated on-premises applications to cloud platforms with minimal downtime, optimizing performance and cost efficiency. - Automated cloud operations and backend workflows using Python scripts, Shell scripting, REST APIs, and Ansible. - Implemented comprehensive monitoring and observability using CloudWatch, Prometheus, Grafana, New Relic, and Nagios to minimize system downtime and improve reliability. - Administered and optimized SQL databases on AWS RDS and Azure SQL, including security and performance tuning. - Delivered 24/7 on-call support to maintain high availability and reliability of production systems. - Created dashboards and visualizations to provide actionable insights for stakeholders. - Initiated and managed CAB changes to enhance system operations and maintain compliance.	
NOC Engineer Movate Technologies	08/2021 to 02/2022
- Monitored and maintained network infrastructure and software components to ensure high availability and reliability. - Troubleshoot and resolved complex technical issues, improving network performance and system uptime. - Configured and managed IP assignments, core network routing, DNS setups, and load balancing for optimized traffic flow. - Utilized SolarWinds, Nagios, and other monitoring tools for real-time visibility, proactive alerting, and performance analysis. - Provided Tier 2 and Tier 3 technical support, exceeding SLA standards for response and resolution times. - Documented incidents, root cause analyses, and lessons learned to improve operational processes.	

- Led installation, upgrade, and deployment projects, ensuring minimal downtime during transitions.
- Designed and implemented system security controls and data assurance mechanisms to meet compliance requirements.
- Collaborated with cross-functional teams during system development lifecycle (SDLC) and participated in change approval (CAB) meetings.
- Built and maintained servers, conducted hardware audits, and implemented automation for faster recovery and configuration management.

SKILLS

- **Cloud Platforms:** AWS (EC2, S3, Lambda, RDS, DynamoDB, VPC, IAM, CloudWatch)
- **IaC & Automation:** Terraform, AWS CDK, Python, Shell scripting
- **Containerization:** Docker, Kubernetes
- **CI/CD & DevOps:** Jenkins, GitHub Actions, Azure DevOps pipelines
- **Monitoring & Logging:** CloudWatch, Prometheus, Grafana
- **OS:** Linux (Ubuntu, CentOS), Windows Server
- **Security & Compliance:** IAM, Security Groups, Encryption
- **Ticketing Tool :** Jira , ServiceNow , Kana

EDUCATION

- SNS College of Technology : 2017 -2021

Bachelor of Electrical and Electronics Engineering
