🌐 rishimj.netlify.app/ 📍 Coimbatore, Tamilnadu

A highly effective DevOps Engineer with 4+ years of experience designing and implementing CI/CD pipelines and managing cloud infrastructure on Azure and AWS. Proven ability to automate infrastructure using Terraform, containerize applications with Docker and Kubernetes, and execute seamless cloud migrations. Expertise in improving deployment reliability, system availability, and operational efficiency through automation, observability, and collaborative DevOps practices.

SKILLS

EDUCATION

BE - Electrical and Electronics Engineering, CGPA: 8.5

SNS College Of Technology

Jun 2021

Coimbatore, Tamilnadu

EXPERIENCE

Devops Engineer

Movate Technologies

Feb 2022 - Present

Chennai, Tamilnadu

- Designed and implemented scalable cloud architectures on AWS and Azure, ensuring high availability and optimal performance for enterprise workloads.
- Developed and maintained Terraform IaC solutions, automating infrastructure provisioning across multi-cloud environments and reducing deployment time by 50%.

- Engineered and optimized CI/CD pipelines using Azure DevOps and Jenkins, resulting in a 60% reduction in manual deployment effort and faster release cycles.
- Managed containerized applications with Docker and Kubernetes, implementing image vulnerability scanning and hardening to enhance security posture.
- Automated cloud operations and backend workflows using Python and Shell scripting, improving efficiency and reducing operational overhead.
- Implemented end-to-end monitoring solutions with CloudWatch and Grafana, proactively identifying and resolving issues, and reducing MTTR by 30%.
- Provided 24/7 on-call production support, maintaining high availability and ensuring rapid incident resolution to minimize downtime.
- Successfully executed VPN and AWS-to-Azure cloud migrations with zero business disruption, ensuring seamless transitions and minimal impact on users.
- Streamlined CI/CD pipelines, boosting deployment speed by 40% through automation and optimization techniques.
- Automated monitoring solutions, increasing incident response efficiency by 25% and improving overall system stability.
- Mentored junior engineers, enhancing team skill sets and productivity, and fostering a culture of continuous learning.

NOC Engineer

Aug 2021 - Feb 2022

Movate Technologies

Chennai, Tamilnadu

- Monitored network infrastructure and software components, proactively identifying and resolving issues to ensure high availability and reliability, exceeding SLAs.
- Troubleshooted complex technical issues, improving network performance and system uptime to exceed service level agreements (SLAs) by 15%.
- Configured IP assignments, routing, DNS, and load balancing, optimizing traffic flow and improving network efficiency by 20%.
- Utilized SolarWinds and Nagios for real-time monitoring, alerting, and performance analysis, enabling proactive issue resolution and preventing service disruptions.
- Provided Tier 2 & 3 support, documenting incidents and root cause analyses (RCAs) to improve operational processes and reduce recurring issues.
- Implemented security controls and collaborated across SDLC teams in CAB meetings, ensuring compliance with security policies and industry best practices.

PROJECTS

- **EKS Kubernetes Deployment:** (<https://github.com/Jrishi123/Eks-Kubernetes.git>)

Deployed containerized applications to AWS EKS using Terraform and Docker, creating a repeatable production grade Kubernetes setup, resulting in a 30% reduction in infrastructure costs.

- **CI/CD Pipeline for Containerized Applications:** (<https://github.com/Jrishi123/CI-CD-pipeline-.git>)

Designed an automated pipeline using Jenkins, Docker, and Kubernetes to test, build, scan, and deploy application images, reducing deployment time by 40%.

- **AWS Infrastructure Automation with Terraform:**(<https://github.com/Jrishi123/AWS-Terraform.git>)

Provisioned fully repeatable AWS infrastructure including VPC, subnets, EC2, security groups, and S3 remote state backend, improving infrastructure consistency and reducing manual effort by 50%.

- **Monitoring & Observability Dashboard:**(<https://github.com/Jrishi123/Monitoring-Dashboard.git>)

Built a comprehensive Prometheus and Grafana observability stack for application, node, and container metrics with proactive alerting, enabling faster issue detection and resolution, reducing MTTR by 20%.
